# MINING, BUSINESS AND STOCKS.

# GRUTLI EQUIPMENT SOON TO BE READY

Chief Consolidated Sinking Beyond 1,400 Level-Iron King Strikes Iron Ore-North Clift Shipping,

Eureka, May 22.-The cause for the uneasiness of Iron Blossom stock the past few days is believed to be the circulation of a report that the mine was not looking just right, and heavy selling orders were sent in by some of the shareholders. The management here states that in crowding the output of the property but little opportunity has been presented to develop the big ore body as it should have been developed, and that at one or two points from which the heavy tonnage of ore has been taken lean streaks were apparently encountered. This no doubt caused the report to circulate. Superintendent Roundy states that the mine is certainly looking good at this time and no trouble is being experienced in keeping the shipments of ore up to the standard.

standard.
Sinking in the Chief Cons, shaft started the early part of the week. At this time the shaft is down 1,400 feet. A donkey engine has been installed on this level and will be used in drapping the shaft down to a depth of 2,000 feet. From the 1,400 foot level the shaft will be double compartment, down to the 2,000, which would indicate that the company is shaping things so that it will be an easy matter to enlarge the shaft and put in modern machinery. shaft and put in modern machinery, should permanent ore deposits be

the company is shaping things so that it will be an easy matter to enlarge the shaft and put in modern machinery, should permanent ore deposits be opened up.

The new hoisting equipment at the Gruth, in East Tintic, will be in operation the early part of next week. The company is putting in a pipe line to carry water to the property from the Bestlemeyer springs. The plant at this property will be complete in every respect. The shaft which is at present down a depth of 70 feet will be sunk deeper with much speed.

Superintendent Roberts of the Iron King, who was in town the other day, gave the information that low grade iron ore had been encountered in the drift on the 400 level of the mine. He stated that it would be necessary to drift considerable distance further before the main ore deposits are opened up. The present showing is very encouraging, however. The big tunnel which is being pun in Iron King ground toward the shaft, has also encountered low grade iron ore. The tunnel work is being handled by contractors and is going along very rapidly on account of the soft formation.

The North lift at Silver is sending down to the Tintic smelter a lot of ore which has been piled at the mine for some time. A force has been put to work, which will break ore enough to permit of a shipment of about 60 tons each month. A contract has been made with the Tintic smelter for the receipt of about this amount of ore monthly and it is believed that the property can be kept in the producing class for this amount of ore for some time to come. There are a great many men in Tintic who have a lot of faith in this property and they will be pleased to learn that the mine will make regular shipment of ore in the future.

At the Nichaless-Tintic property in the northeastern part of the district operations are again under way, a small force of men being at present employed taking out a very good grade of

northeastern part of the district operations are again under way, a small force of men being at present employed, taking out a very good grade of silver-lead ore. A jigging plant has been put up at the property and the ore is being reduced to concentrates. The ore pears to come in bunches, but if conditions continue to improve as they have in the late past, the company will have a big proposition.

The first payment of \$1,000 upon the Mellich group of claims in East Thetic, held under an option by Sait Lake parties, or rather the Montana Mining company, will become due July 1, and everything indicates that the payment will be made. This of course will mean the settlement of the other two payments amounting in all to \$2000.

ments, amounting in all to \$30,000. A the settlement of the other

# EXPERTS TO EXAMINE PINE GANYON FARMS

International People Employ Scientists To Study Fume Problem-Will Finish Railroad June 1.

A veterinarian and a botanist, both A veterinarian and a botamist, both well known experts in their line, have been sent into the field by the International Smelting and Refining company to make a thorough scientific study of plant and animal life in the vicinity of Pine canyon, Tooele county, where the company is erecting a large smelter. The experts have already started their work and it will probably be several months before they finish their work. months before they finish their work.

E. P. Mathewson, who is in charge of the work of installing the big plant for the Cole-Ryan crowd, arrived in Salt Lake today and will spend considerable time looking after the work which is now being carried on at the smelter site. He will remain here until Wednesday. This morning he declared that the company has decided to take no chances of having trouble with the farmers of Tooele at some future date. It has been decided that a thorough examination be made of the district in examination be made of the district in order to decide whether the fumes from the great plant does any damage. It is

intended to make another examination intended to make another examination, through the same experts, six months after the plant begins operations, which will be the first of next year. Besides this the company has an easement with all but one or two of the farmers of the district, so that the land may be taken over by purchase. Besides this the company, through the last legislature, is granted the right of eminent domaine.

eminent domaine.
Through these methods the company intends to ward off any troubles that might arise from smelter smoke. The contracts under which the smelter will operate calls for the sale of the p perty at about half what it will perty at about half what it will be worth as soon as the smelter is working the building of a city of 5,000 persons at Tooele and the increasing of the market for agricultural products will put a value on the land in excess of what it is now worth.

worth and it is not probable that the farmers will be willing to sell.

At present there is about three-quarters of a mile of track laying necessary to complete the railroad into the smelter site. This will require but a few days more and with the surfacing machine owned by the Salt Lake route the track will be completed. This machine is capable of surfacing about half a mile a day.

The old machinery and material from

The old machinery and material from the Highland Boy smelter will be installed as soon as the road is finished which will be June 1. These buildings will be the first to be erected.

The first car of new steel for the-construction work on the smelter is scheduled to arrive on June 7. After that material will be hurried to the plant and work will be going on at a rapid rate. Cement and such lumber as is necessary is now ready to be .111/2 as is necessary is now ready to be shipped in.

ORE GETTING BETTER.

(Pollock Private Wire.) New York, May 24.—A message just received from the Inspiration copper mine reports the shaft now down 175 feet. Sulphide ore now extends from 100 feet to 175 feet, and averages 2.61 per cent copper. The last 15 feet averaged 3.05 per cent copper.

GOOD WORK AT IDAHO GEM.

GOOD WORK AT IDAHO GEM.

(Special to the "News.")

Spanish Fork, May 24.—B. F. Woodward and wife have returned from a two weeks' trip to St. Anthony, Ida., where Mr. Woodward attended the annual meeting of the Idaho Gem Mining company. Mr. Woodward says that he was agreeably surprised with the showing in the shaft, which is down 243 feet, also the showing on the 200-foot level, and the amount of work done by Supt, O. A. Payzant and Spencer Woodward. The same directors and officers, all but one, were re-elected for the ensuing year, with B. F. Woodward as manager. Contracts were let to sink the shaft to the 300-foot level and then drift 250 feet. Spencer Woodward, Henry Brooks and Sanford Woodward are home visiting. home visiting.

WILL WORK FOG HORN GROUP.

Work will begin within the next two months upon the Fog Horn and Jessie groups, near Diamondfield, Nev., according to Anton Lundberg, who owns the property. Mr. Lundberg is visiting Goldfield and other camps of Nevada. where he owns property. Ever since the panic made itself felt in that coun-try Mr. Lundberg has allowed his prop-erties to remain idle. Recently he de-cided that the Nevada country was again on the move and he is now mak-ing extensive preparations to put every-

again on the move and he is now maning extensive preparations to put everything in shape.

Mr. Lundberg asserts that more Utah
capital will find its way to Nevada
during the next few months and that
confidence in the country is being restored. The new mining law that has gone into effect there, he asserts, has cut out wildcat work to a great ex-

### CONCENTRATES.

Nickle Brothers, who have a lease on the Lehi Tintle property in North Tin-tle have gone to the property with a wagon load of sacks and will soon be-gin shipping from the property.

The Mid-Night Bell mining company has developed a stream of water in its property near Alpine. This has retarded work somewhat but is looked upon as a valuable asset to the property.

In spite of the accident at the Con-solidated Mercur plant, which destroyed eight of the leaching tanks, the company still has 17 tanks left, and with these it will continue business, but will make an enlargement to the slimes plant. Material for the addition has plant. Material for the addition has been ordered. The change means that a greater tonnage of oxidized ores here-after will be treated and it will relieve the leaching department of consider-

President D. L. Fulop of the Old Glory Mining company of the Silver Island district of western Utah, de-clares that this week the roads to the mine will be completed, and from then of rich ore will be shipped from the property. The hauling of the ore to Wendover on the Western Pacific has been contracted for. Thus far the com-pany has opened up a good body of

The Oquirrh Black Marble & Mining company of Salt Lake City has been organized to operate the old Cedarstrom black marble deposits at Pelican Point on the west side of Utah lake. The company is capitalized at \$100,000. The officers are E. J. Ramsey of California, president, Judge W. N. Dusenberry, vice president and C. T. Henshall of New York, general superintendent. The New York, general superintendent. The company will open the property up for some big shipping.

GROCERIES.

Layer raisins, per pound .......15@20

The Columbus Consolidated Mining company expects to have its new mammoth pump at the mine by this week and within a week or ten days after will be in a position to handle 800 gallons a minute with the new machinery. The pump weighs 30,000 pounds and a 150 horse power electric motor is required to operate it. As soon as the pump is installed the company will begin working on the east drift off the 400 foot level below the tunuel.

### LOCAL MARKETS

In today's local markets a feature is the scarcity of lettuce, due to short ar-rivals from California, and per contra. a heavy shipment of strawberries from both northern and southern California, also local asparagus in plenty. Dealers also local asparagus in pienty. Dealers report more young onlons eaten in Salt Lake this year, than before, "within the memory of the oldest residenter." Perhaps this may account for the heavy local atmosphere that has brought on local atmosphere that has brought on a veritable rainy season. A welcome feature is also an unusually fine shipment of bananas, which are "going like hot cakes." The town is about out of new potatoes, but there will be in a big shipment by Wednesday, so that the tuber famine is practically ended. The hay situation is not at all mended, and is not likely to be as long as the California racing outfit remains the California racing outfit remains here. Dealers say the consumption of hay over at the track is something fierce. hay over at the track is something fierce, with between 500 and 600 horses there. Nothing less than seven tons of hay are consumed there daily, which makes up for all that is saved by residents about town who are pasturing their horses and cows in vacant lots where the feed is good. Flour is up another dime, high patent retailing at \$3.70 per cwt. where \$2 ought to be the price—and high at that. and high at that.

# MARKET LIFLEESS CLOSING DULL

New York, May 24.—Opening prices of stocks today advanced on a moderate demand. In only a few cases were the gains in excess of a small fraction. Railroad stocks, except the Hill issues, were almost stationary, but there was an absorption of the metal stocks at higher

almost stationary, but there was an absorption of the metal stocks at higher prices. United States Steel reached 60% on some large transactions. Bethlehem Steel gained 2½, Sloss-Sheffield Steel 1¾, Pittsburg, Coal preferred 1½, Great Northern preferred 1½ and Northern Pacific. Westinghouse Electric, Hocking Coal, Mackay Companies and American Malting preferred 1.

The recession of the Harriman stocks, Reading and Amalgamated Copper to a fraction under Saturday's prices caused a heavy tone and dealings became extremely dull. Sorge of the specialties rose briskly, Long Island and Pittsburg Coal gaining 2 and United States Rubber first preferred and Federal Mining preferred 1.

Bonds were steady.

Most of the stocks in which there were transactions changed hands at lower figures but the market generally speaking was at a standstill. Western Union and American Car preferred yielded a point. A slight hardening of the market occurred late in the day but there was no increase in the amount of business. American Car advanced 1, and Sloss-Sheffield Steel preferred 2. The market closed heavy and dull. Prices receded sliwly until checked in sympathy with a rise of about a point in Erie and the second preferred and 2 in the first preferred. Colorado Southern first preferred. Colorado Southern first preferred declined 1½ and Illinois Central and Great Northern Ore Certificates 1.

## PRODUCE.

CHICAGO.

CHICAGO.

Chicago, May 24.—Speculative prices for grain continued to soar on the board of trade today, wheat, corn and oats advancing to new high record marks for the season.

Wheat for May delivery sold during early trading at 1.33½, which is 1½ above Saturday's closing quotation. The September option also established a new top figure at 1.10, while July falled by % of a cent of reaching the highest price reached prior to the sensational slump of a week ago, that delivery advancing more than 1 cent to 1.18½. The market opened rather heavy, with prices % higher to ½ lower, May being at 1.32 to 1.32½, July at 1.17½ to 1.17½ and September at 1.08½ to 1.09½. The easy tone at the start was due to moderate profit-taking. Offerings, however, were quickly absorbed and with prominent commission houses active bidders, prices readily advanced. Unfavorable crop reports from Kansas and strength of European markets were leading influences. The price of corn for May delivery was bid up more than a cent at the start despite greatly increased receipts here, shorts being urgent buyers. During carly trading the price advanced to 1½, a gain of 1½ compared with Saturday's close, July opened unchanged to a shade higher at 69% to 69½@½, and sold up to 69½.

gain of 1½ compared with Saturdays close. July opened unchanged to a shade higher at 63½ to 69½ 2½, and sold up to 69½.

All deliveries of oats advanced to new high marks for the season during the early part of the day, the May option selling at 62, July at 55½ and September at 45½. The upturn was due to brisk demand by shorts which met with only light offerings. At the opening, prices light offerings to ½ higher, July being at 5½ to 55½, and september at 54½ to 55½.

Provisions failed to respond to the strength of grain, the market being steady with only small trade. Prices at the opening were 2½c. lower to a shade higher.

Wheat—The market was strong all day and during the last half-hour sentiment became extremely bullish. May advanced to 143½. July also touched a new high mark at 1.13½. The top for September was reached at 1.12. There was some reaction on profit-taking, but the close was strong, with May up 2c. at 1.34½. July was 1½ higher at 1.11½.

Oats—Later the May delivery advanced to 62½, while July rose to 55½. May was ½ higher at 62½.

Corn—Muy advanced to 70½. The market closed strong, with July up 1@1½, at 70½ ½. May was 1½ higher at 7½; Sept., 111: Dec., 1.09½.

Corn—Muy, 7½; July, 70½ @½; Sept., 63½; Dec., 55½ @½.
